TOUR GUIDE VS. TOUR LEADER

Tour Guide:

Often locals with intimate knowledge of an area, its culture, and history. Their role entails providing commentary, routing the tour, and seeing that people have a good time. They are a licensed, qualified expert who supplies specific information on history, art, architecture and culture of the city/village/

attraction in which he or she is guiding the tour. The guide meets the group at the required place and leaves the group at the end of the tour, they do not travel with the group.

Tour Leader:

An experienced person tasked with ensuring the smooth operation of tours, as well as providing practical support to passengers throughout the whole trip. Their role primarily includes assisting with accommodation, transportation between locations, and communication with tour guides in each stop. A tour leader may provide general guidance around a city or village, and offer information on the place visited on the bus, however they are not required to have specific knowledge on art, architecture, or history. They are not allowed to provide a guided tour or commentary of a city/village/attraction once there and if caught doing so, can be fined.

Please note: Tour leaders/guides are not a standard inclusion in all travel offers. Tour leaders/guides will only be made available when particularly required to enhance the experience of the destination featured.

CLIMATE & AVERAGE TEMPERATURES

Uganda is near the Equator. As a result the climate does not change much and the country can be visited throughout the year. The rainy seasons tend to be from February to April and October to December, but this varies in different areas and it can rain anytime of year, especially in the forest and mountainous areas. Travel can be slower in the rainy season but the views are often better. Gorilla tracking can be muddier but it can certainly be done. In the mountainous areas it is much colder than on the plains and the rainfall is greater. The temperatures on the plains tend to be between 21°C and 30°C and in the mountainous areas they can go down to 10°C in certain months, especially November.
